

Prescription News – Patient Access

From the 1st July 2014 we are changing the way patients order their prescriptions on line. From July we will be using our own clinical system rather than our present stand alone system

To access the new system please go to www.Patient.co.uk/access, by following the simple links you will be given a PIN and Password to enable you to use the new system. It is simple and quick and once you register you wont need to do so again. The system is used by lots of surgeries at is safe and secure and conforms to all NHS confidentiality regulations.

Currently when ordering an on line prescription you can nominate a different pharmacy each time, however it will be necessary for you to register a permanently nominated pharmacy unless you wish to collect your prescription from the surgery. If you do not have a permanently nominated pharmacy, you can download a nomination form from our website and drop it into the surgery next time you are passing or there is a form at the end of this text.

Registering with patient access will have other benefits as well as later in the summer we will be introducing appointment that can be booked on line and you will need your PIN and password to do this.

Looking even further into the future Patient Access will eventually allow you to access your records on line!

Register now at:
